CARLOS GOMEZ HERNANDEZ

ANALYST / DEVELOPER

2020-11-02

To whom it may concern,

My name is Carlos Gomez Hernandez and I'm an analyst and developer. My former colleague Kevin has given me excellent feedback on Broadridge and I have eagerly anticipated job openings with your organization. I would like to express my interest for software developer or analyst positions.

I am confident in saying that I am an excellent candidate for these job positions. I have extensive experience working with analytics and large data sets, as well as experience with software development. The following project is a personal application that contains some information about my work and acts as a platform to host my data analytics projects.

https://www.carlosgomezhernandez.com/

The stack used for this application includes:

- Django as main framework and Django-Rest framework to handle APIS.
- Django ORML and Python scripts to cleanup and organize the data.
- HTML, Boostrap.JS and CSS for the front end.
- Charts.JS for the front-end Visualizations.
- Azure VM as hosting service.
- NGNX as Webservice.

I believe to be a good culture fit for your organization because I have worked for various fortune 500 companies as my direct customers and have good understanding of the challenges that organizations face to scale. What attracts me most to work for Broadridge is the nature of the business, the opportunity to learn, the extensive experience of your leaders. I feel that I could be a valuable asset to your organization and grow within it as well.

Thank you very much for your consideration.
